Certified Scrum Product Owner (CSPO®)

Certification: Certified Scrum Product Owner ® (CSPO®)   **Accreditor**: Scrum Alliance
Duration: 2 Days   **Delivery**:   Live-Online Workshop

This two-day workshop will empower you with in-depth knowledge of Scrum and its application to complex project problems. You will earn the Certified Scrum Product Owner (CSPO) designation awarded by the Scrum Alliance; the most widely recognized network of agile software development professionals in the world.
You will gain direct experience with creating, managing and prioritizing business initiatives using the Scrum framework. Through direct experience and deep understanding of Scrum, you will have confidence to apply the techniques effectively in your particular project situations.

Course Objectives

- Practice creating shared project goals & company vision
- Explore company values essential for innovation
- Practice stakeholder facilitation techniques
- Explore customer-supplier collaboration techniques
- Apply estimating, planning and project tracking techniques
- Practice requirements gathering and business analysis skills
- Gain insights into team motivation, agile contracts, risk management & organisational change

Who Should Attend

The course is aimed at those who are performing, or about to take over, the role of the Product Owner. It is also suitable for business analysts, project managers, product managers, line managers, Scrum Masters, and anyone who wishes to deepen their knowledge of Scrum and Product Ownership.

Prerequisites

There are no course prerequisites.

- Business analysis and prioritization techniques
- Validating the product strategy
- The impact of culture on strategy for new product development
- History of Scrum and Agile Software Development
- Estimating, planning and tracking progress

Trainer

Mr. Abid Quereshi; Scrum Alliance Certified Enterprise Coach, Certified Scrum Trainer and active Software Developer based in London, UK.

For over 22 years Abid Quereshi has helped over 50 organizations in 15 countries increase business agility. The insights he brings to the classroom are based on direct experience in developing, testing, specifying and tracking on real software projects. Experience with the latest product development practices allows Abid to relate to the current challenges faced by a wide range of business and IT professionals.

The Scrum Alliance recognizes Abid as one of only 7 Certified Enterprise Coaches (CEC) in the UK who have demonstrated coaching success across enterprises from the executive level to delivery teams.
